TOOLKIT FOR INFORMATION SECURITY MANAGEMENT SYSTEMS (ISMS)

The Standards Association of Zimbabwe has published the following information security management systems standards:

SAZS ISO/IEC 17799:2006 Information Technology - Security techniques – Code of practice for information security management.

This gives guidelines and general principles for initiating, implementing, maintaining and improving information security management in an organization. (*Supersedes SAZS 757 part 1*)

SAZS ISO/IEC 27001:2008 Information Technology - Security Techniques – Information management systems – Requirements

Standard specifies the processes to enable businesses to establish, implement, review and monitor, manage and maintain effective ISMS. It complements **SAZS ISO IEC 17799 (Supersedes SAZS 757 part 2)**.

Benefits of implementing the standard:

- Guards against information leaks which can create havoc to business operations
- Reassures customers and suppliers
- Information is an asset and its protection adds value to an organization
- Ensure business continuity
